Document Body

Hi Jim-

As I mentioned on Tuesday, I have a few questions about Sites 8, 9, and 29. Some of them you answered last week via phone, but below are additional questions. With respect to specific technical comments, I will defer to Ryan Miya.

- The Draft Naval Station Treasure Island Reuse Plan does not apply to Sites 8 and 29 because the sites were transferred to CalTrans in 2001. Is there a reuse plan for the areas? If so, does that reuse plan allow for residential development on either site?
- The relationship described in the document between CalTrans and the Navy for Sites 8 and 29 is confusing. The document states that the sites were transferred to CalTrans and that CalTrans was identified as a potentially responsible party in the transfer deed. However,

Navy is completing the RI. What exactly is the role of CalTrans in characterization/site cleanup?

Thanks,

Christine Katin
